

MUHAMMAD JAWAD

AI DEVELOPER | PYTHON | GENERATIVE AI | AI AUTOMATION

Multan, Punjab, Pakistan | +92 329 8636377 | jawadmjawad06@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI Developer and BS Information Technology student with hands-on experience building end-to-end AI applications using Python, FastAPI, LLM APIs, machine learning, and automation. Built agentic research, automated video-generation, and secure document-processing systems, with practical experience integrating APIs, debugging pipelines, testing, and deployment. Microsoft Certified: Azure AI Fundamentals. Seeking internship or junior AI, Python, ML, or software development opportunities.

TECHNICAL SKILLS

Programming & Backend

Python, FastAPI, REST APIs, Streamlit

AI & Machine Learning

Generative AI, LLM APIs, Machine Learning, Scikit-learn, NLP, Prompt Engineering

Automation & Data

n8n, API Integration, Workflow Automation, ChromaDB / Vector Retrieval, PostgreSQL, SQLite

Tools & Deployment

Git, GitHub, Docker, FFmpeg, VS Code, Google Colab, Vercel, Render, Railway

EXPERIENCE

AI Developer - Independent Projects | Remote | Jun 2026 - Present

- Design and build AI-powered applications with Python, FastAPI, Streamlit, LLM APIs, machine learning, and automation workflows.
- Integrate external APIs, vector retrieval, media processing, file validation, error handling, and cloud deployment across end-to-end project pipelines.
- Maintain GitHub repositories, test functionality, troubleshoot runtime/deployment issues, and iterate on working products based on real use cases.

SELECTED PROJECTS

ResearchMind AI - Agentic Research Assistant | [Python](#), [FastAPI](#), [Streamlit](#), [Groq](#), [Tavily](#), [ChromaDB](#)

- Built an agentic research workflow that plans sub-questions, searches the web, analyzes uploaded PDFs, synthesizes findings, fact-checks outputs, and exports structured cited PDF reports.
- Implemented vector-based retrieval and frontend/backend integration for document-assisted research and persistent research sessions.

AI Video Studio - Automated Short-Form Video Generator | [Python](#), [FastAPI](#), [Groq](#), [Pexels](#), [Edge TTS](#), [FFmpeg](#)

- Built an end-to-end pipeline that turns a topic into a vertical short-form video using AI-generated scripts, stock media, voice-over, subtitles, transitions, and automated rendering.
- Added project history, settings, media fallbacks, and robust rendering logic for repeatable video generation workflows.

DocShield Reader - Secure Multi-Format File Analysis | [Python](#), [Streamlit](#), [PyMuPDF](#), [pdfplumber](#), [python-magic](#)

- Developed a multi-format document reader for PDF, DOCX, XLSX, images, JSON, CSV, TXT and related formats, with text extraction and inspection tools.
- Added binary-signature validation, spoofed-extension detection, file-type inspection, and safe handling workflows for suspicious or mismatched files.

EDUCATION

Bachelor of Science (BS) in Information Technology | Sep 2023 - Jun 2027 (Expected)

Muhammad Nawaz Sharif University of Agriculture, Multan | **CGPA: 3.36/4.00**

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals | Microsoft | Aug 2026 | [Verify Credential](#)

Artificial Intelligence (AI) Training | National Vocational & Technical Training Commission (NAVTC), Pakistan

Languages: Urdu (Native) | Saraiki (Native) | English (Working Proficiency)
